 - ▲ Door to door

Air Freight

ProTrans International, Inc.® provides air cargo services to every major region in the world including North America, Latin & South America, Europe, the Far & Middle East, South Africa, the Caribbean, and Australia.

Export Documents

ProTrans can handle all aspects of your shipments. These include documentation, conformance to custom's regulations, and the air transportation required for exporting your shipments from your local door to your door overseas. As you can see, we offer flexibility with our full service capabilities.

Freight Visibility

Our tracking system provides a view into your shipment and can be done in near to real time. Critical information about your shipment can be displayed or downloaded giving you the tools to make critical production planning decisions in a timely manner.

Carrier Relationships

ProTrans works directly with top carriers that offer the most consistent transit and largest capacity. Because we contract with these carriers, we gain leverage in both pricing and space allocation. We work closely with multiple carriers to offer the most direct and economical routing of your cargo. This allows us to create the greatest possible flexibility in routing and pricing.

Charters

ProTrans' air charter program provides customized solutions when commercial airline capacity alone will not adequately service your special requirements. Our charter program allows customers to have a reasonable alternative to scheduled airline times.

Consolidation

Through ProTrans' air consolidation services, we provide the best transit times available with frequent flight schedules, flexible airline scheduling, competitive rates, and cost savings.

Measured Cycle Times

We measure our carriers to ensure that the highest standards of on-time delivery are met. We report our true cycle times and include our customers in the process of measuring every carrier on every shipment.
