

# International Integrated Services

## CUSTOMS & CONSULTING

ProTrans International, Inc.® offers an integrated program combining inland transportation and inventory control services enabling you to control the “total cost” of your logistics supply chain needs. We provide cost analysis reviews to identify key factors that may control or reduce cost. Our services are tailor-made to fit your needs, providing you with a competitive edge in your industry. The management team at ProTrans have comprehensive experience in customs brokerage services.

### International Integrated Services Team

Building on the world class services of domestic transportation/consolidation and warehousing, ProTrans established an International Integrated Services (IIS) team to support the global needs of our clients' supply chains. Partnered with exclusive agents and carriers throughout the world, ProTrans offers both intra and multi-country consolidations in key economic zones within Europe, Latin/South America and Asia, as well as robust Ocean and Air contracts.

### Technology

ProTrans recognizes that “real-time” and accurate information systems will be the critical components that will separate us from our competition. With this in mind, our web based supply chain system is fully EDI compliant allowing our clients to manage (both by exception and reporting) their inventory from purchase order issuance through to receipt.

By being EDI compliant, we receive ASNs with part number information, we therefore eliminate data entry steps allowing a reduction in operational costs, that are passed on to our customers. We prevent potential delays by working on compliance requirements in an anticipated fashion.

### Web Enabled Tracking

Our customers are able to track shipments at part number level from the shipper, through the entire brokerage process, and final destination. Shipment status scenarios and information required to manage your program are accessible with ease via reports retrievable on an as needed basis.

### Foreign Trade Zones

ProTrans operates a FTZ in El Paso, Texas. This facility provides us with special customs features such as allowing domestic activity involving foreign items to take place prior to formal customs entry. Our Foreign Trade Zone provides our customers the benefit of duty exemption, duty deferral and inverted tariffs. ProTrans has also been operating a bonded warehouse in Laredo, Texas since 2004.
